Writing

EYFS & Year 1

Writing

Year 2 - Year 6

It is our mission to ensure every child is a fluent reader by the end of Key Stage 1, therefore early reading is our priority. Pupils are taught daily by a Read, Write Inc. (RWI) teacher in groups organised by stage, not age. In addition, 10 min daily 1:1 sessions take place to ensure that all pupils 'keep up not catch up'. Pupils are assessed ½ termly, progressing rapidly through the programme.

RWI bookbag books are taken home and are matched to pupils' RWI group therefore sounds and words read at home are decodable and read with success, ensuring a positive home reading experience. Parents are not asked to teach their child to read but instead are asked to support the school in fostering a love of reading. RWI parent guides and helpful information are shared at parent sessions and on our school website.

Whole class reading (WCR) texts linked to ½ termly imaginative learning projects (ILP) are read daily as a class. Knowledge and skills are explicitly taught through 'VIPERS' forming a structured, daily whole class reading lesson. Broadening vocabulary is a key focus for our pupils and so this viper is a key component of the WCR approach.

This computer-based program aides monitoring of progress and guides key stage 2 teachers and pupils to the appropriate level text based on high challenge, low threat guizzes taken by pupils to check they have understood what they have read. In addition, our MCS 'Reading Spine' provides six age appropriate must-read texts (EYFS - Y6) which pupils are explicitly signposted to throughout the year.

Talk for Writing is a unique approach which enables pupils to read and write independently for a variety of audiences and purposes. They are supported to internalize the language needed to write through 'talking the text'. The process allows children to move from dependence towards independence, with the teacher using shared and guided teaching to develop the ability to write creatively.

Units are structured with modelling at the heart and where learning is broken into bite-size chunks; taught under the framework of The Writing Rainbow. Pupils are prepared for independent writing through modelling of ideas, grammar and writing techniques. A wide range of genres are taught throughout the year that ensure full coverage of the national curriculum. Grammar, punctuation and spelling are taught explicitly alongside these units.

Mathematics

EYFS - Year 6

Children follow a mastery programme built around a child-centred lesson design that models and embeds a growth mindset approach to maths and focuses on helping all children to build a deep understanding of mathematical concepts.

Science

EYFS - Year 6

History
EYFS - Year 6

Keystage

history

Geography EYFS - Year 6

Art and Design

We use the PZAZ scheme to deliver weekly science lessons. Pupils develop scientific knowledge and conceptual understanding, are aware of the nature, processes and methods of science and are equipped with the knowledge they need to understand uses and implications of science today and for the future.

We adopt an enquiry-based approach to teaching history, encouraging children to investigate historical questions using evidence to construct their own ideas about the past. Pupils build knowledge and understanding of significant people, events and changes in the past, and develop a chronological understanding of history in the local area, in Britain and the Wider World. Pupils learn to 'think' like a historian, examining and interpreting sources, asking enquiry questions, making deductions and communicating their ideas.

By the time our pupils leave they will have developed their knowledge about their locality, the UK and the wider world – making them global citizens. Pupils will develop an understanding of the human and physical features of geography, take part in fieldwork and look at some of the current geographical issues of the modern world.

At Mount Charles school, pupils learn the knowledge and skills required to experiment, invent and create their own artwork. Lessons are thoughtfully sequenced into 4 steps inspire, develop, create and evaluate. Great artists, craft makers and designers throughout history are explored, inspiring pupils in their work. Pupils have the opportunity to explore their ideas and become proficient in drawing, painting, sculpture and many other art, craft and design techniques. Kapow Primary offers a supportive tool in developing children's artistic techniques, through quality video tutorials and skills-based lesson ideas, to enable children to master the skills they need to create their final masterpiece.

Design Technology

EYFS – Year 6

At Mount Charles we teach an engaging Design and Technology curriculum which allows our pupils to apply their creativity in a range of reallife focused projects. We encourage pupils to become risk takers, problems solvers and innovators through planning and designing a range of products such as buses, torches, embroidered cushions and fruit salads. Teachers use high quality resources from Kapow Primary to plan and teach lessons which equip our pupils with skills that build progressively through each year group. Through following a STEM (Science, Technology, Engineering and Mathematics) design process pupils combine their knowledge of other subjects to plan and create their final piece of work.

Computing

EYFS - Year 6

Every child should have the right to a computing curriculum that champions excellence; supporting pupils in achieving their best. We understand the immense value technology plays not only in supporting the Computing and whole school curriculum but overall in the day-to-day life of our school. Purple Mash facilitates a full and sequential computing curriculum which prepares pupils for life in an increasingly technological world.

P.E. EYFS – Year 6

We are extremely proud of our PE curriculum offer at Mount Charles; taking part in many wider community sporting events throughout the year. Our pupils enjoy a broad range of physical activities including gymnastics, dance, games, athletics and outdoor and adventurous activities. Pupils take part in regular physical activity for sustained periods of time, engage in competitive sports and are taught how to lead healthy, active lives.

Music EYFS – Year 6

At Mount Charles, we believe that music teaching and learning should be fun, relevant and inspiring; central to each pupils' academic, social and emotional development. Charanga provides a sequential and progressive curriculum including opportunities to play a wide range of musical instruments both individually and as part of an ensemble. Pupils learn how to listen and appraise as well as how to create and explore their own music making, singing and performance.

Languages Year 3 - Year 6

Through the scheme provided by Twinkl, children in Key Stage 2 are guided through a programme of learning French. Using games, songs and role play they learn how to hold simple conversations and read and write basic phrases. These skills enable them to communicate with a French speaking person and prepare them for learning other languages at secondary school. Pupils will reflect on other cultures and understand that there is an exciting world beyond the UK which they can enjoy.

R.E. EYFS – Year 6

P.S.H.E.

EYFS – Year 6

Through half termly themes, R.E is taught in an exciting, engaging and challenging way. With Christianity at the heart of the teaching, Buddhism, Hinduism, Judaism and Sikhism are explored as children move up through the school. Discovery R.E provides a safe enquiry space, encourages deep questioning, enhances critical thinking and evaluation skills, supports spiritual development and equips pupils to celebrate diversity.

PHSE is taught using a mindfulness approach, which brings together Personal, Social, Health and Economic education, emotional literacy, social skills and spiritual development. The whole school works on the same theme every half term, developing their awareness of self, others, our school and the wider community.

Please see individual subject policies for further detail about each curriculum area.
